

**School of Life Sciences
University of Hyderabad**

Announcement for

“Logo design competition for BioQuest”

On behalf of Dean School of Life Sciences, invitations are open to design a logo for BioQuest, an annual event of the School of Life Sciences. All the Students/Research scholars/Staff /Faculties of the University may participate and submit their design till 20th August 2017. One participant may submit maximum of two designs. The participant with the selected design will be awarded with cash prize of Rs. 2000 /-. Following is the description about the event, which may help you to find the theme for the logo.

“BioQuest is an annual event of the School of Life Sciences (University of Hyderabad) to showcase the ongoing teaching and research programs of the School. The purpose of the event is to bring experts from various disciplines from academy and industry to a common platform to interact and explore possible collaborations. BioQuest provides an excellent opportunity to the students and research scholars of the school to get exposed to the recent advancements in the technologies and concepts in Life Sciences.”

The theme of BioQuest 2017 is “Integrative Approach for Understanding Life Processes in Health and Disease”. It is widely acknowledged that today’s problems in biology cannot be addressed with expertise in any one discipline. Hence, besides biological sciences, there is a need for expertise in chemical, physical, mathematical, statistical and computational sciences to address with a holistic approach. BioQuest 2017 is aptly tuned for this scientific endeavor and is designed to provide a platform for scientists working in divergent areas within the campus of University of Hyderabad to come together, interact, exchange ideas and explore collaborations.

To participate in the competition please submit your entries through mail with the mail header “BioQuest Logo” to pankaj@uohyd.ac.in by 20th August 2017.

Note: Please visit School of life Sciences website at: sls.uohyd.ac.in for details of the last two BioQuests.

Dean, School of Life Science
